PROJECT ANNOUNCEMENT

US Army Corps of Engineers (USACE)
Engineer Research and Development Center (ERDC)

Title: Improving Data Anomaly Detection and Forecasting in the US Army Corps of Engineers Reservoir Sedimentation Information (RSI) Database.

Announcement Type: Initial Announcement

Funding Opportunity Number: W81EWF-23-SOI-0007

Assistance Listing Number: 12.630

Date Issued: 26 May 2023

Key Dates: Phase I announcement will be open to receive statements of interest continuously until 12:00 noon Central Time (CT), 14 July 2023, at which point all statements of interest must be received.

If invited to Phase II, full proposal applications will be due at 12:00 noon Central Time (CT), 11 August 2023.

Estimated Award Ceiling: $60,000

Estimated Total Program Funding: $100,000

Agency Contact: Kisha M. Craig, Kisha.M.Craig@usace.army.mil
I. Program Description

A. Short Description of Funding Opportunity

ERDC seeks applications for: Improving Data Anomaly Detection and Forecasting in the US Army Corps of Engineers Reservoir Sedimentation Information (RSI) Database.

B. The US Army Corps of Engineers (USACE) has been developing the RSI database since 2014 to replace the Reservoir Sedimentation Database (RESED) with a more useful tool. The RSI database is updated by USACE districts with area-capacity curves based on local surveys of the reservoir pools and the calculation of the area-elevation and area-volume relationships.

Previous work done under a CESU Agreement developed machine learning based algorithms to identify anomalies in these districts supplied data. Those methods were tested in a subset of the full dataset. The RSI database will be updated during the summer of 2023 by addressing the data anomalies identified in the previous work. Districts will either provide updated/revised data, or the data will be flagged for end users. Districts will also be adding any new surveys collected since the last update in 2017.

C. Program Description/Objective: Through this agreement, USACE intends to award a base set of tasks consisting of two tasks.

I. **Base Task 1: Increasing Composite Dataset for Analysis:** For the previous analysis, only USACE and USBR reservoirs that had three or more surveys in the RSI system were included. This task will expanding the preliminary flagging, autonomous anomaly detection, and prediction model development to include all USACE and USBR reservoirs within the RSI system that have two or more surveys. In the current database, that includes 133 additional reservoirs. This number is expected to increase with the summer 2023 updates. Expanding the survey flagging process would specifically benefit data quality control for the RSI system. The additional flagging analysis will require quantifying reservoir pool elevations for capacity analysis and vertical datum correction factors for the 133+ additional USACE and USBR reservoirs.

Note: USBR is in the process of developing their own independent database more suited to agency needs. At the time of this solicitation, there are plans to eventually connect the two databases for seamless updating. However, it is expected that contact and coordination with a USBR collaborator will be necessary to obtain the most recent data from that agency.

II. **Base Task 2: Demonstration of Forecasting Feasibility:** Comparing model forecasted capacities with values from extrapolating known sedimentation rates will be a valuable tool for USACE to estimate economic, environmental,
operation, and social impacts of future sedimentation and reservoirs. This comparison will serve as a validation to the proof of concept for predicting reservoir sedimentation using OLS and machine learning predictive models.

An option may be awarded for FY25 based on sufficient progress and results of the base tasks in early FY24.

III. **Option Task 1: Developing Automated ArcGIS-based Analysis and Visualization Tools:** Develop an ArcGIS Pro Add-In tool to predict capacity loss for a reservoir, from the date of dam construction to present day and use the results of Base Task 2 to predict future loss. The input data required for the capacity loss prediction models include the dam location, construction date, and original volume capacity. All other model parameters should be derived through automated GIS analysis. The tools should include a ‘water supply specific’ visualization tool component and use a stoplight ranking for reservoirs based on a number of fields from the database.

This product should be developed to integrate with the RIMORPHIS geomorphic database while collaborating with USACE and other federal partners to identify a permanent, public-facing home for the database.

D. Public Benefit

The US Army Corps of Engineers intends to make the RSI database available for public use. The results of this effort will reduce uncertainty in the contained data and provide useful tools for prediction of future conditions. These data can be used by Federal, State, and local agencies as well as stakeholders to make management and development decisions and assess current and future risk. The specific tasks in this agreement will reduce the uncertainty in predictions and provide more seamless access to these data.

E. Authorization: 10 USC 4001

F. Legal Requirements

G. Program-Specific Requirements

The selectee will be required to provide quarterly updates on the progress and invite review and feedback from USACE.
II. Federal Award Information

The following information applies to awards issued under this announcement:

- This is a new program
- The Government anticipates 1 Federal awards from this announcement, but reserves the right to award more or less
- The total amount of funding expected to be awarded through this announcement is $100,000
- The expected amount of funding for each award is $60,000 for Year 1, and $40,000 for Year 2 option.
- Award(s) from this announcement will be Cooperative Agreement(s)
- The anticipated period of performance is two years
- Applications for renewal or supplementation of existing projects are eligible to compete with applications for new Federal awards
- The government reserves the right to accept only portions of an application and to negotiate with potential awardees
- Government’s substantial involvement includes USACE will provide data support in the form of access to the updated database (summer 2023) and the critical review of the tools developed. USACE will provide agency workshops on the data review and reservoir sedimentation metrics results through the HH&C Community of Practice as continuing education for agency SME’s in conjunction with the selected university Principal Investigator (PI).

III. Eligibility Information

A. Eligible Applicants

This opportunity is restricted to non-federal partners of the Great Rivers Cooperative Ecosystems Studies Unit (CESU).

Disclosures of current and pending support made in this application may render an applicant ineligible for funding. Prior to award and throughout the period of performance, ERDC may continue to request updated continuing and pending support information, which will be reviewed and may result in discontinuation of funding.

Religious organizations are entitled to compete on equal footing with secular organizations for Federal financial assistance as described in E.O. 13798, “Promoting Free Speech and Religious Liberty.”

B. Cost Sharing or Matching

This action will be 100% funded by USACE.
C. Conflict of Interest

a) General Requirement for Disclosure

You and your organization must disclose any potential or actual scientific or nonscientific conflict of interest(s) to us. You must also disclose any potential or actual conflict(s) of interest for any identified sub recipient you include in your application. We may have to ask you more questions if we need more information.

At our discretion, we may ask you for a conflict-of-interest mitigation plan after you submit your application. Your plan is subject to our approval.

b) Scientific Conflict of Interest

Scientific collaborations on research and development projects are generally the result of close collaboration prior to the submission of applications for support. Accordingly, these collaborations should be considered when considering potential conflicts of interest. The potential conflict is mitigated by the disclosure of these collaborations, and the list of current and pending support you provide for senior and key researchers. Therefore, you must include in your list of current and pending support all collaborators, even if they did not formally provide support.

D. Other

a) Licensure or Certification

You must include the Acknowledgment of Support and Disclaimer on all materials created or produced under our awards. This language may be found in the Terms and Conditions included in the award documents.

E. Certifications, representations, and assurances

1. To apply for grants and other funding opportunities the applicant entity must have an active registration in the System for Award Management (SAM). Applications will not be accepted through Grants.gov or other methods unless the entity is registered in SAM. Registration in SAM now includes the acceptance of Certifications and Assurances. See https://www.grants.gov/web/grants/grantors/grantor-standard-language.html for details on how to register in SAM, and Grants.gov

2. The Federal Assistance Certifications Report is an attestation that the entity will abide by the requirements of the various laws and regulations; therefore, as applicable, you are still required to submit any documentation, including the SF-LLL Disclosure of Lobbying Activities (if award value exceeds $100,000.00), and, if applicable, informing DoD of unpaid delinquent tax liability or a felony conviction under any Federal law.
3. Certification Regarding Disclosure of Funding Sources. By checking "I Agree" on the SF 424 (R&R) block 17 you agree to abide by the following statement: "By signing this application, I certify the proposing entity is in compliance with Section 223(a) of the William M. (Mac) Thornberry National Defense Authorization Act for Fiscal Year 2021 which requires that: (a) the PI and other key personnel certify that the current and pending support provided on the proposal is current, accurate and complete; (B) agree to update such disclosure at the request of the agency prior to the award of support and at any subsequent time the agency determines appropriate during the term of the award; and (c) the PI and other key personnel have been made aware of the requirements under Section 223(a)(1) of this Act. I am aware that any false, fictitious, or fraudulent statements or claims may subject me to criminal, civil, or administrative penalties. (U.S. code, Title 218, Section 1001)."

IV. Application and Submission Information (2 Phase Process)

A. Phase I: Submission of Statement of Interest (SOI)

1. Materials Requested for Statement of Interest/Qualifications:

   a. Please provide the following via e-mail attachment to: Kisha M. Craig, Kisha.M.Craig@usace.army.mil (Maximum length: 2 pages, single-spaced 12 pt. font).

      i. Name, Organization and Contact Information

      ii. Brief Statement of Qualifications (including):
          • Biographical Sketch,
          • Relevant past projects and clients with brief descriptions of these projects,
          • Staff, faculty or students available to work on this project and their areas of expertise,
          • Any brief description of capabilities to successfully complete the project you may wish to add (e.g. equipment, laboratory facilities, greenhouse facilities, field facilities, etc.).

Note: A proposed budget is NOT requested at this time.

The administrative point of contact is Kisha M. Craig, Kisha.M.Craig@usace.army.mil

2. ERDC will only accept SOIs submitted on or before 14 July 2023, 12:00 noon Central Time (CT).

Based on a review of the Statements of Interest received, an investigator or investigators will be invited to move to Phase II which is to prepare a full study proposal. Statements will be evaluated based on the investigator’s specific experience and capabilities in areas related
to the study requirements.

B. Phase II (if invited): Submission of Full Application Package

1. Address to Request Application Package
The complete funding opportunity announcement, application forms, and instructions are available for download at Grants.gov.

The administrative point of contact is Kisha M. Craig, Kisha.M.Craig@usace.army.mil.

2. Content and Form of Application Submission
All mandatory forms and any applicable optional forms must be completed in accordance with the instructions on the forms and the additional instructions below.

a. SF 424 R&R - Application for Federal Assistance

b. Full Technical Proposal – Discussion of the nature and scope of the research and technical approach. Additional information on prior work in this area, descriptions of available equipment, data and facilities, and resumes of personnel who will be participating in this effort should also be included.

c. Cost Proposal/Budget – Clear, concise, and accurate cost proposals reflect the offeror’s financial plan for accomplishing the effort contained in the technical proposal. As part of its cost proposal, the offeror shall submit a full budget in sufficient detail so that a reasonableness determination can be made. A recommended template will be included in the invitation to Phase II. The SF 424 Research & Related Budget Form can be used as a guide but is required if the sub-recipient uses it. The cost breakdown should include the following, if applicable:

1. Direct Labor: Direct labor should be detailed by level of effort (i.e. numbers of hours, etc.) of each labor category and the applicable labor rate. The source of labor rates shall be identified and verified. If rates are estimated, please provide the historical based used and clearly identify all escalation applied to derive the proposed rates.

2. Fringe Benefit Rates: The source of fringe benefit rate shall be identified and verified.

3. Travel: Travel costs must include a purpose and breakdown per trip to include destination, number of travelers, and duration.

4. Materials/Equipment: List all material/equipment items by type and kind with associated costs and advise if the costs are based on vendor quotes and/or engineering estimates; provide copies of vendor quotes and/or catalog pricing data.

5. Subrecipient costs: Submit all subrecipient proposals and analyses. Provide the method of selection used to determine the subrecipient.

6. Tuition: Provide details and verification for any tuition amounts proposed.

7. Indirect Costs: Currently the negotiated indirect rate for awards
through the CESU is 17.5%.
8. Any other proposed costs: The source should be identified and verified.

d. R&R Senior/Key Person Profile
   1. Biographical Sketch
   2. Disclosure of Current and Pending Support:
      i. A list of all current projects the individual is working on, in
         addition to any future support the individual has applied to
         receive, regardless of the source.
      ii. Title and objectives of the other research projects.
      iii. The percentage per year to be devoted to the other projects.
      iv. The total amount of support the individual is receiving in
         connection to each of the other research projects or will receive
         if other applications are awarded.
      v. Name and address of the agencies and/or other parties
         supporting the other research projects.
      vi. Period of performance for the other research projects.

e. SF-LLL Disclosure of Lobbying Activities (if award value exceeds
   $100,000.00)

f. Data Management Plan:

A data management plan is a document that describes which data generated through
the course of the proposed research will be shared and preserved, how it will be
done, or explains why data sharing or preservation is not possible or scientifically
appropriate, or why the costs of sharing or preservation are incommensurate with the
value of doing so. See also: DoD Instruction 3200.12.
=2019-04-30-073122-220

Data management plans are generally 2 pages in length, and must include the
following considerations:
(1) The types of data, software, and other materials to be produced.
(2) How the data will be acquired.
(3) Time and location of data acquisition, if scientifically pertinent.
(4) How the data will be processed.
(5) The file formats and the naming conventions that will be used.
(6) A description of the quality assurance and quality control measures during
    collection, analysis, and processing.
(7) A description of dataset origin when existing data resources are used.
(8) A description of the standards to be used for data and metadata format and
    content.
(9) Appropriate timeframe for preservation.
(10) The plan may consider the balance between the relative value of data
    preservation and other factors such as the associated cost and administrative
burden. The plan will provide a justification for such decisions.

3. ERDC will only accept full application packages submitted on or before 11 August 2023, 12:00 noon Central Time (CT).

4. Submission Instructions
Choose ONE of the following submission methods:

a. E-mail:
Format all documents to print on Letter (8 ½ x 11”) paper. E-mail proposal to Kisha M. Craig, Kisha.M.Craig@usace.army.mil.

Applicants are not required to submit proposals through Grants.gov. However, if applications are submitted via the internet, applicants are responsible for ensuring that their Grants.gov proposal submission is received in its entirety.

All applicants choosing to use Grants.gov to submit proposals must be registered and have account with Grants.gov. It may take up to three weeks to complete Grants.gov registration. For more information on registration, go to https://www.grants.gov/web/grants/applicants.html.

Organizations must have a Unique Entity Identifier (UEI) and active System for Award Management (SAM) registration to apply for Federal financial assistance.

C. Application Withdrawal:
An applicant may withdraw an application at any time before award by written notice via email. Notice of withdrawal shall be sent to the agency point of contact identified in this announcement and are effective upon receipt.

D. Funding Restrictions

Per 2 CFR § 200.216, funds may not be used to procure telecommunications equipment or video surveillance services or equipment produced by
- Huawei Technologies Company,
- ZTE Corporation Hytera Communications Corporation,
- Hangzhou Hikvision Digital Technology Company,
- Dahua Technology Company
- any subsidiary or affiliate of such entities

Funds from an award may not be used to attain fee or profit.

V. Application Review Information

A. Selection Criteria
Applications will be evaluated using the following criteria, listed in descending order of
importance:

● Technical merits of the proposed research and development; and

● Potential relationship of the proposed research and development to Department of Defense missions

● Previous Experience with the RSI database

B. Review and Selection Process:
Each application will be reviewed based on the selection criteria above rather than against other applications submitted under this Announcement.

Based on the Peer or Scientific Review, proposals will be categorized as Selectable or Not Selectable (see definitions below). The selection of the source for award will be based on the Peer or Scientific Review, as well as importance to agency programs and funding availability.

i. Selectable: Proposals are recommended for acceptance if sufficient funding is available.

ii. Not Selectable: Even if sufficient funding existed, the proposal should not be funded.

Note: The Government reserves the right to award some, all, or none of proposals. When the Government elects to award only a part of a proposal, the selected part may be categorized as Selectable, though the proposal as a whole may not merit such a categorization.

In addition to the technical/program review, the DoD performs a budget review and a risk review as directed by 2 CFR 200.206, including a review of the Federal Awardee Performance and Integrity Information System (FAPIIS). Applicants may review information in FAPIIS and comment on any information entered into that system. Comments made by applicants will be taken into account in addition to other information in considering applicants’ integrity, business ethics, and record of performance.

VI. Federal Award Administration Information

The notification e-mail regarding a selection is not authorization to commit or expend DoD funds. A DoD grants officer is the only person authorized to obligate and approve the use of federal funds. This authorization is in the form of a signed Notice of Award. Applicants whose applications are recommended will be contacted by a DoD grants officer to discuss any additional information required for award. This may include representations and certifications, revised budgets or budget explanations, or other information as applicable to the proposed award. The award start date will be determined at this time.

VII. Reporting Requirements

The terms and conditions of the award will provide the specifics on how to submit the reports and any required sections for those reports.
In accordance with 2 CFR 200.328 (Financial Reporting) and 2 CFR 200.329 (Program Performance)

Awardees will need to comply with the reporting requirements in 2 CFR 170: Reporting Subaward and Executive Compensation Information.

The terms and conditions of the award will provide the specifics on how to submit the reports and any required sections for those reports.

**VIII. Federal Contacts**

Questions should be directed to:

Kisha M. Craig  
Grants Specialist  
Kisha.M.Craig@usace.army.mil

Chelsea M. Whitten  
Grants Officer  
Chelsea.M.Whitten@usace.army.mil

Questions regarding Grants.gov should be directed to: the toll-free number 1-800-518-4726 and email at support@grants.gov.

**IX. Other Information**

The Federal government is not obligated to make any Federal award as a result of the announcement. Only grants officers can bind the Federal government to the expenditure of fund.

Applicants are advised to monitor Grants.gov for potential amendments to this Notice of Funding Opportunity. You can also elect to be automatically notified by Grants.gov whenever there is a change to the opportunity.

Applications must not include any information that has been identified as classified national security information under authorities established in Executive Order 12958, Classified National Security Information.
